

## A BRICK

A brick is hard but brittle and can easily be broken. Once straw was added to it to give extra strength to keep it from crumbling.

We are much like a brick, one good lick and we crumble into a thousand pieces. Only God's love and protection mixed throughout our lives gives us the strength to endure the pressures put upon us everyday.

We need God's strength as the brick needs straw to keep us together so that we may withstand all that may come against us.
